PROFILE

- Enthusiastic Computer Engineering student with hands-on project experience in React.js, JavaScript, and web development. Strong foundation in Java, Python, and full-stack technologies. Eager to contribute to real-world development teams while continuing to build skills in data structures, algorithms, and software engineering. Completed a React.js internship, demonstrating professionalism, responsibility, and technical capability.

WORK EXPERIENCE

React.js Intern – CreArt Solutions Pvt. Ltd., Ahmedabad (Remote)
Duration: 2nd July 2025 – 16th July 2025

- Successfully completed a 15-day remote internship focused on real-time web development using React.js.
- Worked under the guidance of the Project Manager, contributing to UI development tasks and gaining hands-on experience with component-based architecture.

PROJECTS

Society Management Website | GitHub Link   2023 -2025
Team Project

- A web-based platform designed to streamline society operations, providing features for announcements, complaint management, visitor tracking, and maintenance requests. The system enables secure authentication, allowing residents and administrators to manage society-related tasks efficiently.
- Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB

Smart Daily Planner | Live Demo   2025

- The Smart Daily Planner is a productivity-focused web application designed to help users organize their daily tasks, manage reminders, and stay on schedule. It allows users to create task lists, set custom times for tasks, receive alerts, record voice notes, and switch between light and dark themes for a personalized experience.
- Tech Stack: HTML, CSS, JavaScript, React.js

AI Career path Finder | Live Demo   2024

- The Career Path Finder is an AI-powered web application built to assist students in making informed career decisions based on their interests, academic strengths, and personal preferences.
- Tech Stack: HTML, CSS, JavaScript, Python
